Web Developer • *Lidia's Cleaning Service*
July 2018 to Present
- Designed, implemented and monitored web pages for continuous improvement in a production environment.
- Oversaw troubleshooting of technical issues to solve problems within a reasonable time frame.
- Collaborated with client from concept through final delivery of product.

PROJECTS

Hiking Trail Review
https://hiking-trail-review.herokuapp.com/

Hiking Trail Review is a full-stack web application. The application allows users to share their favorite hiking trails and review them. This full-stack application is built with Node.js, Express, MongoDB, Mongoose, Passport.js on the application layer. The client-side is Bootstrap, HTML, CSS, and Javascript rendered via EJS. Users add hiking trails with images and a description. The application is hosted on Heroku servers and MLab.

Sound Keys Play
https://janettxg.github.io/sound-keys-play/

Sound Keys Play is an application where alphabetical keys are mapped to sound and colored circles. Keys are tracked and can be replayed to create musical notes and color schemes. The application was created using the Howler.js library for audio playback, Paper.js to render vector graphics, and vanilla javascript to record and replay keys.

Guess That Color Game
https://janettxg.github.io/color-game/

Guess That Color Game is a game where players have to pick the correct color tile based on displayed RGB values. This app tests the player's RGB knowledge, in easy and hard modes. This game was built with vanilla JavaScript, HTML, and CSS.

EDUCATION

Associate of Applied Science - Interior Design
Northern Virginia Community College • 2015
